VESTA & LEED 2009 IEQ 4.4 Credit Eligibility

Credit acceptance for LEED 2009 IEQ 4.4, Composite Wood, was expanded to include a second pathway (CARB ULEF/NAF) through LEED interpretation LI#10250 (reference USGBC website @ <http://www.usgbc.org/node/1732513?view=interpretations>). As noted within the interpretation, this also applies to several other LEED versions published previous to LEED v4, including LEED v2.2.

Arauco VESTA products are manufactured with MUF binder systems that are compliant with USGBC requirements as listed in LI#10250, and are third-party certified to the California Air Resources Board (CARB) Ultra Low Emitting Formaldehyde (ULEF) emissions requirements; associated CARB Executive Order letters are available upon request. Please contact your Arauco Sales Representative for more information.

Regards,

Jake Elston
Vice President of Corporate Operations
Arauco North America
