Welcome to the DSI Wood Finish Room!

Your wood finishing and coatings professionals pride themselves on quality. DSI prides itself on service and convenience. Now, in order to make things easier for you and your team, we’ve put together this booklet showcasing common sundry items you use in your finish room everyday.

Looking for abrasives and pads? We’ve got them. Need masks, respirators, gloves and aprons? We’ve got those as well. From wiping rags to mix cups and spray guns to top-of-the-line pumps, this catalog is an easy reference guide to get you what you need.

These items are in stock and can be dropped off along with your next finish order. For your convenience, a handy order form is included in this booklet. Simply fill it out and e-mail it to sales@maildsi.com, fax it to 1-800-792-5081 or call an inside sales rep at 800-745-1778.

Contact your knowledgeable DSI Finish Specialist or call 800-745-1778 for questions or more information.

52-513: Deluxe unit includes two regulators for two gun operation plus main line blow off. Also included are three 1/4” ball valves.
52-515: Unit includes filter, 1/2” port sizes and comes with auto drain and filter load indicator standard.
52-551: Replacement Cartridge.

This unit is a point of use oil/water filter with a desiccant drying cartridge for single gun painting operations where dry clean air is critical. Perfect for low volume shops.

52-533: Unit includes mini desiccant dryer.
52-534: Unit includes one regulator for single gun operation.
52-559: Replacement Cartridge.
FILTERS & COALESCERS

The Filter / Coalescer is a two stage combination unit that offers the finest system for removal of water, dirt and oil in the industry. Due to the prefilter design this unit can be used in high contamination areas without high element replacement rates. The first stage removes particles and water while the 2nd stage removes oil contaminants. This unit is rated at 60 SCFM and removes water, dirt and oil to 0.01 micron at 98.99998% efficiency. For point of use operation.

52-520: Unit includes filter / Coalescer only. It has 1/2” port sizes and comes with auto drain and filter load indicators standard.
52-522: Unit includes filter / Coalescer with one regulator and two ball valves. Port sizes are 1/2” and come with auto drain and filter load indicators standard. Second ball valve is used for main line.
52-523: Unit includes filter / Coalescer with two regulators and three ball valves. Third ball valve used for main line. Unit has 1/2” port sizes and comes with auto drain and filter load indicators standard.
52-551: Replacement Cartridge (1st Stage)
52-553: Replacement Cartridge (2nd Stage)

MAIN LINE COMBO

52-535: Combo unit is designed to remove bulk oil, dirt and water to 0.01 microns. Unit combines first stage separator and second stage Coalescer. Perfect for removing contaminants to extend life of down stream units. Second stage comes with filter load indicator while auto drains are standard on both units. Rated at 90 SCFM and has 3/4” ports.
52-557: Replacement Cartridge (1st Stage)
52-558: Replacement Cartridge (2nd Stage)

FILTER / DRYER

52-531: This unit is a point of use two stage oil/water filter with a desiccant drying cartridge for single gun painting operations where dry clean air is critical, such as automobile or fine wood finishing. Desiccant unit has an indicator to show when unit is saturated and needs replacement. Unit comes with ball valve at inlet and regulator for single gun regulation. This is what all fine finishers should have. Maximum flow is 25 SCFM and rated to one (1) micron.
52-554: Replacement Cartridge (1st Stage)
52-555: Replacement Cartridge (2nd Stage)
With innovative coating technologies for the application of paints, wet coatings, powder coatings and other liquid materials, WAGNER has been helping to raise the standard of surface finishes all over the world for more than 60 years.

**WAGNER Cobra®**

Cobra® is an exclusive high pressure double diaphragm pump suitable for Airless and AirCoat applications up to 250 bar/3,625 psi.

The pump works with extremely low pulsation and creates a uniform paint flow, achieving a perfect spray pattern and superb surface quality. With its minimized internal volumes, the pump is designed to greatly reduce solvent consumption and material waste during flushing and color-change operations.
