Top 2016 Kerfkore Distributors

Kerfkore announces distributor awards for 2016

Each year, Kerfkore Company gives two distributor awards based on their purchases and sales of Kerfkore products. One award given is for the largest volume while another is for the greatest percent increase compared to the previous year.

For 2016, **Distributor Service, Inc.** receives the award for the Largest Volume Distributor of Kerfkore products. They sell the complete line of bendable and lightweight panels plus they inventory these materials so they can be delivered quickly to supply their customer's requirements. Their sales this year was achieved through standard product sales along with some nice customer projects. We appreciate **DSI's** support from their management and sales team to make this award possible.

For the Greatest Sales Increase in 2016, the award goes to **Rugby Architectural Building Products/New York**. They also sell a complete mix of bendable and lightweight products and inventory a good representation of the Kerfkore product line. Their growth was a combination of strong sales from a variety of these bendable and lightweight products. We appreciate their effort in achieving this increase in 2016.

Our congratulations to **DSI** and **Rugby** for their performance in 2016. We are delighted to present them with the Distributor of the Year awards from Kerfkore Company.

About Kerfkore

Kerfkore Company is a manufacturer of patented bendable substrates, lightweight structural composite panels and architectural panels. These products allow for the creation of numerous designs that open the opportunity to produce curves and innovative products as vast as your imagination. No matter what type of curve or lightweight needs you may have, we have a product that can provide quicker results that are more accurate, with higher quality, and easier to fabricate than traditional methods. We are committed to providing "green" products that can have a positive impact on our environment and also help you achieve some of the qualifications needed for the USGBC's LEED certification program.
