We challenge the ordinary by exploring the limits of perfection to engineer the finest plywood for the most demanding clients.
Challenging the ordinary since 1941

1941
The beginning in Baños de Río Tobía as a family sawmill

1973
"Maderas Garnica", the plywood box factory

1985
Garnica starts to produce industrial plywood

1987
Garnica begins exporting its products

1995
New factory in Fuenmayor (La Rioja, Spain)

1996
New factory in Valencia de Don Juan (León, Spain)

2003
Logroño Corporate Headquarters (La Rioja, Spain)

2006
Management team becomes shareholders of the company

2008
Second factory in Baños (La Rioja, Spain)

2010
New factory in Samazan (France)

2016
Garnica updates its brand and ICG joins the group as an investor

2018
Maderas de Llodio acquisition, Radiata pine plywood production (Basque Country, Spain)

2020
Maderas de Llodio acquisition, Radiata pine plywood production (Basque Country, Spain)

2023
New factory in Fuenmayor (La Rioja, Spain)

2026
Second factory in Baños (La Rioja, Spain)
Headquartered in Logroño, Spain, Garnica has six production sites, five in Spain and one in France. A second French production site will come online in 2021.

**Logroño.**
Corporate headquarters, centralizing and optimizing services.

**Baños de Río Tobía I.**
The first and most versatile facility, manufacturing all product types.

**Baños de Río Tobía II.**
Specializes in large-format panels.

**Fuenmayor.**
Specializes in value-added products.

**Valencia de Don Juan.**
Garnica’s largest and most efficient facility, featuring Europe’s biggest press.

**Maderas de Llodio.**
A 2018 acquisition specializing in radiata pine products.

**Samazan.**
Focused on production of poplar veneers for use by other Garnica facilities.

**Troyes.**
New production site scheduled to come online in 2021.
We use locally sourced wood from sustainable forests and plantations.
• Our raw material, wood, plays an essential role in a circular economy. It’s renewable, recyclable, reusable and biodegradable.
• Our main wood source, poplar, captures more than 12 tons of CO2/year per hectare and grows four times faster than tropical species.

We innovate in products and services and emphasize ongoing improvement throughout our organization.
• Our nursery features sophisticated clone research and development, constantly improving our poplar timber.
• Our quality control department ensures that products meet the highest standards and obtain all relevant certifications.

We offer solutions that are tailored to each client based on our extensive product range.
• Our industrial customization services provide the flexibility and adaptability to respond to diverse client needs.
• At the same time, we're able to produce large product volumes efficiently and competitively.

With the support of our valued clients, we've maintained double-digit annual growth for over 20 years.
• Six production facilities.
• More than 1,200 employees.
• 360,000 m³ of production capacity.
• Sales of 300 million dollars.
• 93% of production exported to over 45 countries.

A worldwide reference in the plywood industry
Applications

Our extensive product range allows multiple uses to meet market demand.

RV

Furniture

Decoration

Construction

Marine
## Products

Our lightweight panels are notable for an array of exceptional properties including consistent quality, stability, and machinability.
